FLOODPLAIN ASSESSMENT ISSUED FOR THE STORMWATER DRAINAGE REPAIRS OF THE TAREA CAPAT THE SAVANNAH RIVER SITE

A Floodplain Assessment has been prepared in compliance with 10 CFR Part 1022 as documentation of the potential impacts of the stormwater drainage repairs of the T Area Cap at the Savannah River Site (SRS). Stormwater drainage repairs to the CERCLA T Area Cap necessitate installation of an access roadbed. This assessment examines how a DOE project to install a permanent access roadbed with an encroachment onto the floodplain of approximately .12 acres would affect the floodplain. The project is associated with the 100-year floodplain of the Savannah River, located on the SRS in Aiken County, South Carolina. The public comment period for the Floodplain Assessment is 15 days.

A copy of the referenced Floodplain Assessment is available in the administrative record. The administrative record is available in the information repositories listed below:

- DOE Public Reading Room at the Gregg-Graniteville Library at the University of South Carolina Aiken campus in Aiken, SC; and
- Thomas Cooper Library Government Documents Department at the University of South Carolina in Columbia, SC.

Hard copies of the referenced Floodplain Assessment are also available at the following locations:

- Reese Library Government Information Section at Augusta State University in Augusta, GA; and
- Asa H. Gordon Library at Savannah State University in Savannah, GA

Comments on the Floodplain Assessment should be directed to Mr. Paul Sauerborn.
